Chairman John Lloyd Resigns From School Board; George Evans Appointed Chairman

Staff Awarded Additional
25c Cost of Living Bonus;
Miss K. Milley Given Year's
Leave of Absence.

Regular meeting of the school board was held at the weekend. Present: Chairman Lloyd, Trustees Churla, Evans, Janostak and Stigler.

A letter of resignation was received from Jules Ancelot, part-time janitor. He asked that should a vacancy occur in the janitor staff demanding full time employment, that he be considered for the position.

Mr. Ancelot's resignation was accepted and Dave Sudworth, another part-time janitor, was appointed to fill the vacancy. Mr. Sudworth is now employed full time and will receive a salary of \$100 per month.

A letter from the local Red Cross branch asking the board to choose one of its members to attend the Red Cross meetings, was filed.

The contract, between Oliver Barringham, taximan, and the board, was renewed.

A circular letter from the Provincial Board of Health advised the board that the schools would remain closed until September 15.

An insurance policy, Mrs. H. Gate agent, was renewed.

Mr. Joe Emmerson was appointed auditor for the ensuing year.

A letter was received from Miss Kathleen Milley asking for a year's leave of absence. Poor health was

given as the reason for the request. A year's leave of absence was granted. Miss Myrtle Johnston was appointed to fill the position.

The recent findings of a federal commission investigating the rise in the cost of living has resulted in an additional 25c per day cost of living bonus. The bonus took effect on September 1st. The board unanimously approved the granting of the 25c to all its employees. Added to the 18c per day bonus now in effect the bonus is now 43c.

Following the passing of accounts Chairman Lloyd tendered his resignation from the board. Mr. Lloyd has been employed at the West Canadian Collieries, Blairmore, for some considerable time and has now secured housing accommodation in that town. He plans to leave Coleman September 15th. His resignation was accepted with regret. George Evans was appointed chairman of the board.

AFTER THIRTY YEARS—Twin sisters who hadn't seen each other in 30 years, Mrs. J. Bentley, left, and Mrs. Sid Morrison, of Calgary, are shown above at Mrs. Bentley's home, 947 East Thirteenth, discussing the many things that have happened to them since they were separated as infants in Coleman, Alberta. They met for the first time last Friday.

"LONG TIME NO SEE"

Twin Sisters, Separated 30 Years Ago as Infants, Meet

"Long time no see!"

That was the casual greeting that Mrs. Sid Morrison, of Calgary, gave to her twin sister, Mrs. J. Bentley, 947 East Thirteenth, whom she had not seen in 30 years. The twins, who came from a family of nine children had lost their mother when they were very young, and they had been adopted by different families. Mrs. Bentley was raised in Nanaimo, and Mrs. Morrison in Coleman, Alberta, where they were born, later moving to Drumheller, and then to Calgary.

SISTERS LOSE TOUCH

Mrs. Bentley had corresponded with other members of her family, and had often enquired about her twin sister, but had never been able to contact her. It was Mrs. Morrison's husband who finally arranged the meeting.

Mr. Morrison is in the medical corps with the Seaforts, and had been transferred to the West Coast. He got in touch with Mrs. Bentley, and when his wife came to town last Friday he brought her up to see her sister.

see her sister.

The twins haven't stopped talking since. They were afraid that they would have nothing in common, having been brought up in different environments, but they are "like two peas in a pod," says Mrs. Bentley.

EYES ARE ALIKE

The only obvious similarity between the two women are their eyes, which are very dark. Mrs. Morrison, who is the elder of the two by 20 minutes, is a trifle taller than her sister. Their respective husbands have been comparing notes all week, and they have come to the conclusion that the twins don't look alike. Mrs. Morrison's young son is of the same opinion.

The twins, who were 30 last April 20 are having their first formal photograph taken together next week.

Mrs. Morrison is returning to Calgary as soon as her husband's official duties are completed here. But she won't lose track of her twin sister again. Both women agree on that.—Vancouver Province.

Prepare For Christmas Parcel Fund

Will Solicit At Bank September
13 And 27; Citizens Wishing
To Contribute Foodstuffs,
Money, Etc., May Give Same
To Mrs. Lonsbury, Sr., Or
Mrs. R. Lloyd.

The Ladies' Auxiliary of the Canadian Legion are now preparing to gather money and material with which to send every Coleman man in the armed forces a Christmas parcel.

On pay Saturday, September 13 and 27, aided by the Legion's wooden soldier, which has been loaned to them, the ladies will solicit donations with which to buy foodstuffs, etc., to make up the parcels. According to Legion officials there are approximately 125 Coleman men at present in uniform. The Auxiliary estimates about \$300 will have to be raised.

One problem that confronts the Auxiliary each year, between the Christmas and the New Year, is the attitude taken by some that the soldiers are making as much money as those at home. This may, or may not, be true, but one point that stands out above all others is the fact that the men in uniform are ready to sacrifice their lives in this fight for freedom, and to receive something from "the folks back home" at Christmas time makes them feel that they are not forgotten, and that their efforts in the struggle between the Democracies and the Axis is uppermost in the minds of those at home.

Those who do not wish to contribute at the bank, but are inclined to give a cheque or foodstuffs to the fund can have their donations received by either Mrs. J. Lonsbury or Mrs. R. Lloyd.

Recruiting Officer to be Here Sept. 18

Recruits Will Be Allowed
Leave of Absence To Com-
plete Harvesting.

Major Jenkins will visit this district on a recruiting trip which will include the following points: Pincher Creek, September 15; Cowley and Lundbreck, September 16; Bellevue, September 17; Coleman, September 18; Blairmore, September 19.

Men are required for all branches of the service and suitable recruits will be posted to units immediately. Friends may arrange to be posted to the same unit. Men who are willing to join the army but who wish to complete harvesting first, may enlist now and be given leave of absence until harvesting is over.

Full information may be obtained from Major Jenkins during his visit.

All men of military age who are ready to take an active part for freedom in Canada's army, with its promise of a healthy life and good living conditions, its opportunities for advancement, for specialist's pay, for comradeship and recreation, should get in touch with Major Jenkins.

GARDENS BADLY HIT BY FROST

Sunday night's heavy frost wrought havoc with certain flowers which had been the pride and joy of local gardeners. Frost this year came earlier than previous years. Only the hardier plants are now to be seen blooming.

FROM WISDOM'S WORKSHOP
Strange but true: paradox: The more we give of ourselves to others, the bigger we become.

Convention of First Slovak Mutual Benefit Society Held Here This Week; John Danco Presided

Delegates From British Columbia And Alberta; Review
Clauses of Constitution;
Banquet To Be Given Delegates.

A three-day convention of the First Slovak Mutual Benefit Society of Canada, Alberta and British Columbia divisions, is being held here this week. Twenty-eight delegates are present, coming from Fernie on the West to Lethbridge and Shaunessy in the East. Presiding is John Danco, of Blairmore. A. Kalivoda, of Coleman, and Joe Krokosky, of Blairmore, are secretary and assistant secretary respectively.

It is five years since the last convention was held, at Hillcrest. Due to present world conditions it was thought advisable by officials to review the clauses in the constitution and this is the main business of the convention. It has been stated that the next convention will be held after the war.

Two wires have been drafted, one to Prime Minister Mackenzie King, and the other to President Benes of the Czechoslovakia government in exile at London, England. They read:

Hon. W. L. Mackenzie King,
Ottawa, Canada.
We, the delegates of the First Slovak Mutual Benefit Society of Canada, assembled in our third convention in Coleman, Alberta, convey to you our sincerest greetings, and wish you and the rest of our national leaders all success in

your untiring efforts during these trying times. For Victory. J. Danco, convention president.
Dr. E. Benes,
President, Provisional Czechoslovak Government in Exile, London, England.

We, the loyal sons of the Slovak nation, assembled in convention of the First Slovak Mutual Benefit Society of Canada, in Coleman, Alberta, convey to you our sincerest greetings and promise you all possible assistance within our means during your present struggle for the liberation of the Czechoslovak people, and may your forces for truth and freedom again prevail.

—John Danco, convention president.

Following the convention Coleman Slovak Mutual Benefit Society will be host to the delegates at a banquet.

Registered at the convention: Shaunessy: Steve Vyrostek and Steve Kotch.

Lethbridge: Andrew Kilraik.

Fernie: George Kusmir.

Natal: Joseph Hajducak.

Hillcrest: John Lipinka.

Bellevue: George Klecken, Joseph Kubasek, Tom Ondros, Joseph Sikina, Joseph Ondros.

Blairmore: John Danco, Martin Margetak, Ignac Hucal, Joseph Krokosky, sr., Joseph Krokosky, jr., Mike Petrik, Joseph Lencucha.

Coleman: Steve Lesoky, Louis Bubniak, Alois Kalivoda, Thomas Siska, John Trstenaky, Steve Siska, Karol Gejdos, Samuel Peknik.

Cigarette Fund Notes

Dear Sirs: Your cigarettes dated May 26th received and I can assure you I was glad to get them and thanks a million. I have received all the cigarettes you have sent except the month of March. I send the card every time I receive the cigarettes. Have you received any of them?

Roach Cousins gave me The Journals to read and I got quite a kick out of them. They were the first ones I had seen for close on six months. Roach and I are hungry for news. The weather here is hot and we are working every day.

I hope it will soon be over, so cheerio for now and thanking the Legion and all who have made it possible for us to have the cigarettes. Best regards to all. Spr. E. Kennedy.

'OBJECTOR' RETURNS HIS FIRST ARMY PAY

A soldier in Camp Roberts, Calif., is willing, if his country demands, to take military training, but wants no money for it. Sending his first month's pay \$25.26 to the Treasury's Conscience Fund, he wrote:

"I am returning this money as unearned because to remain true to my beliefs and faithful to God I could not use nor conscientiously learn to use deadly weapons on my fellow men."

United Church Notes

Sunday, September 14th, will be a Flower-harvest service, at 11 a.m., with special music by the choir.

The church will be suitably decorated with flowers and vegetables for the service, and anyone having flowers or vegetables available for this purpose may leave them at the church, Saturday afternoon or inform the decorating committee of the same and we will be very grateful.

We trust you will avail yourselves of the opportunity of attending this service.

We were favoured with a much appreciated duet last Sunday morning by Aliman A. Kaufman, who has delighted our congregation with his solos on previous occasions, and Dr. C. Rose.

—Rev. J. E. Kirk, Minister.

Brubaker in the New Yorker: It is certain that the manufacture of many articles will soon be curtailed because of a scarcity of raw materials. If we are then still troubled with too much spending money, that is a complaint which the grocery and the Treasury will cure.

Lions Open Season With Smoker

Artists Entertain; Quiz
Contest Hit of Evening.

The Lions Club opened its Fall season with a smoker, with a smoker in the I.O.O.F. hall. In the absence of President Dickleson, Vice-President Dr. Leske, of Bellevue, presided.

Artists included A. Wragg, and W. Picard, who gave a humorous skit. Pop-Eye drew a number of trick drawings which were well received. Mr. Sidney Short, a guest speaker, paid tribute to the Lions for their aggressiveness and voiced his enjoyment at being in their midst. Another guest, Gordon Way, played several piano selections.

The All Star feature of the evening was Fred Guerdar's Quiz contest. Those answering the questions were awarded a cigar and approximately twenty cigars were won. The questions were of an educational nature.

Following a very enjoyable evening the party came to an end at midnight. The next meeting will be held on Monday, September 22.

WEDDINGS

BROWN - HUCK
On Saturday evening, September 6th, the marriage of Annie Vernice Huck, of Bellevue, and Alfred Harland Brown, of Blairmore, was solemnized at the registrar's office, Coleman, with Rev. J. E. Kirk officiating. The bride was attended by Miss Elsie Brooks, of Bellevue, and Mr. Michael Stecky, of Blairmore, supported the groom. The happy young couple will reside at Blairmore.

BUTALA - LIPOVSKI
The marriage of Miss Greta Lipovski, of Coleman, to Mr. Daniel Butala, formerly of Fernie and now of Currie barracks, Calgary, took place at Holy Ghost church on Sunday, Rev. Father Sullivan officiating. Attendants were the bride's sister, Mrs. F. DeCocco, and the groom's brother, Mr. Frank Butala. The groom was a former member of the Fernie band.

Bridging The Gaps

Farmers of Western Canada and others whose business is dependent for its welfare on the prosperity of Western agriculture will watch with keen interest the development of the new measures recently devised by the federal government with the object of stiffening control of commodity prices with the dual objective of furthering the war effort and of conserving the interests of the consumers.

While it must be admitted at the outset that farmers, as well as industrial workers and dwellers of urban centres, are consumers and therefore, to some extent, interested in seeing that the prices of commodities which they have to purchase are kept down to a reasonable level and within reach of their purchasing power, yet the farmer is also vendor of consumer goods, and that particular type of goods which comprise absolute necessities for the health and well-being of those consumers who are not directly dependent upon agriculture for their livelihood.

There would be no problem for the government in its efforts to prevent undue advances in the prices of commodities if parity existed between the prices the farmers received for the foodstuffs which constitute their sole stock in trade and the prices which all consumers, including the farmers have to pay for other necessities common to all classes of consumers. Perhaps this statement should be modified by stating that the problem for the government, at least, would not be so acute.

Unfortunately, for the government, for the farmers and for all other classes of consumers this parity of prices does not exist. Not only is there too wide a spread between the price the farmer receives for many of the food commodities which he sells in the domestic markets and the price the consumer has to pay for at least some of these commodities, but there is also too great a margin between the price the farmer has to pay for necessities which he is unable to produce and the price he receives for those which he does produce.

A Dual Problem

This latter disparity in the prices of agricultural and industrial necessities which must be purchased by consumers of all classes is reflected in recently published figures which showed that the wholesale price index for July of this year stood at 91, while the farm price factor stood at 71, as compared with the standard of 100 for prices in 1926. While, it is true, that within the past year the wholesale farm commodity price index has advanced from approximately 64, it will be observed that it is still 20 points below the general wholesale price index. In other words, the farmer is handicapped to the tune of 20 cents on the dollar of his purchasing power as compared with industry generally, if the 1926 standard is accepted as a reasonable indicator.

Apart altogether from the question of prices which the farmer should receive for those of his commodities which are being, and to be, exported to Great Britain to assist the front line effort against the forces of aggression, the federal government is faced with a dual problem, therefore, in exercising economic controls over domestically sold commodities. If the welfare of agriculture is to be accorded the merit it deserves, the margin between the sale and purchase prices of farm commodities in the domestic market must be narrowed and the margin between retail prices of agricultural and industrial necessities for the consumer must be reduced, and, in both cases, with the object of improving the farmer's position and without impairing the interests of consumers generally.

Voluntary Move Desirable

Something has already been done in the field of curtailment of the differential between farm and consumer prices of farm commodities by regulations designed to reduce costs of distribution. An illustration of this is the ban on sliced bread and prohibition of special deliveries of bread to consumers. So far, only the fringe of this field has been touched. In this direction much more could be done. To quote an authority "the urban consumer has been serviced to death." A considerable contribution towards this problem could be effected by voluntary effort on the part of processors and retailers with the co-operation of the consumers. Savings which could thus be effected should be divided fairly between the producer and the consumer, thus narrowing the margin between farm and consumer prices of farm commodities. An educational campaign among consumers should bring home a realization to them that such a move is in their best interests. Unless the consumers and industry are prepared to make these concessions voluntarily, they may expect more control measures along these lines.

The problem of narrowing the margin between prices of farm commodities and other necessities for all consumers, on the farm and in the city, is more intricate, but it is one which must be solved, not only in the interests of the farmer but of the country as a whole, and particularly for the benefit of the western agricultural provinces. More control measures with this specific objective in view may be expected with the co-ordination of new consumers' price controls vested in the war time prices and trade board under the finance department and of the controls of essential war materials by the munitions and supply department.

The Way It Works

Apple and tomato juices will be available in quantity for Canadians this winter. This should lessen the need for imported citrus fruits, and thus conserve exchange, while putting the money into the pockets of Canadian producers who have lost their overseas markets.

An Amazing Sight

A hamper of onions, a rarity in Britain, astounded Queen Mary during an inspection at a Bristol restaurant. "What an amazing sight," she said. "I have not seen so many onions for a long time."

Dice were used as early as 2,750 B.C.

Two Of A Kind

A good story relates to Lord Halifax's Western trip. One of his henchmen earnestly assured the train-man that he would find his Lordship a thoroughly democratic fellow. "He'll find me just the same," said the train-man cheerfully.

Enough For Ten

Deebach, one of Suffolk's smallest villages, set out to raise the equivalent of £225, the cost of a Bren gun, during a war weapons week. The inhabitants of the hamlet's 20 houses donated \$2,250, enough for 10 guns.

Walls that bend are hailed as a new discovery in building. They'd be especially useful around the garage.

Civilian Casualties

Such Words To Describe Nazi Murderers Seem Pitifully Weak

One of the most ominous signs of this terrible time is the readiness with which language seems to be yielding to the destructive tide beating down moral ramparts that it has taken long centuries to erect. In the last year things were bad enough, but because we have been caloused either by the crimes of the totalitarian tyrants or by the mass blood-lettings of the post-war revolutions we now accept without protest descriptive terms that gloss over the blackest crimes.

A London dispatch summing up the bomb slaughter in Britain says that "civilian casualties" from January 1, 1940, to June 30, 1941, totalled 41,900 killed and 52,678 wounded so severely that they had to be hospitalized.

And there is no room in Britain's hospitals now for any but serious cases. Mere flesh wounds and contusions, even to the point of shock, have to be treated at home—if the bombers leave any home.

"Civilian casualties"—what a cool, slick, technical phrase! And nobody protests such cavalier language any more. But in the 18th century the premeditated murder of defenceless men, women and children would have been called, massacre, at least. True enough, the last century had no such human abattoirs to talk about, but when it did have hot-blooded butcheries, such as the killing of Armenians, or the pogroms of Kishineff, the words used to describe them were words that denoted crime, not war.

When Herods of the skies now kill lambs we use language appropriate to a cold-blooded general staff communiqué, not words that would have lapped white-hot from the tongue of every statesman and publicist of the western world only one generation ago.

Those 41,900 human beings done to death in 18 months on city streets and country lanes number four-fifths as many as the American battle deaths during our entire participation in the last war. That total was 59,510 killed. But they died in combat on the field of honor with arms in their hands, and the glory of their taking off cannot be minimized. They were slain by foemen worthy of their steel. The "civilian casualties"—God save the mark!—were murdered in cold blood, and no trick of language can take the mark of Cain off the arch-murderers.—Chicago Daily News.

Booklet For Army

Sets Out Principles To Be Followed By Officers

The British Army Council has authorized a booklet for officers called "The Soldier's Welfare." Urging officers to look after the men it lays down the following principles:

Welfare is concerned with the whole needs of men—body, mind and spirit.

There can be no good leadership without good welfare.

Good officers make good troops and happy and contented men.

Care of men is opposed to pampering and, if properly understood, will foster self-reliance.

Men will endure hardships cheerfully, but discontent will arise if they are caused by inefficiency, lack of understanding or "red tape."

Every man is entitled to be treated as a human being, likewise orders and restrictions should be explained, and the man's point of view considered.

Men are easily upset by what they consider to be unfair treatment and inequality of sacrifice.

Boredom is the worst enemy of army morale.

Tricking A Spy

Japanese Was Told Tall Story By Singapore Officials

The London Sunday Chronicle says Singapore authorities learnt that a certain Japanese was trying to snoop out the hiding-place of large British aircraft reserves. Instead of arresting him, they drew a gigantic herring across his trail. That hangers were being used which could be sunk 50 feet under water by a large lift made in Birmingham. Tokyo swallowed the herring, hook, line and sinker!

An Old Ceremony

On the anniversary of the Battle of Waterloo, the king of England receives from the reigning Duke of Wellington a small banner by which presentation the duke holds the estates voted to his great ancestor by parliament.

A Good Habit

Get into the habit of looking for the silver lining of the cloud, and when you have found it, continue to look at it, rather than at the leaden gray in the middle. It will help you over many hard places.

Doubtful Performers

Culling The Unprofitable Border In The Poultry Flock

Every poultryman has to face the problem of keeping the flock on a profitable basis at this season of the year. Many birds may cease to lay while others continue in production under the same feeding conditions.

In order to keep the non-layers down to the lowest number it is advisable to cull thoroughly and remove all the birds that are unprofitable layers, says W. T. Scott, Head Poultryman, Dominion Experimental Station Harrow, Ontario.

Summer culling is easy, as most birds capable of laying a profitable number of eggs throughout the year are still in production at this season. Those that are not laying are doubtful performers and should be handled and examined. Only by so doing can a definite opinion be formed of body condition, and unless the birds carry a fair amount of flesh they will not continue to lay throughout the year. Thin breasted birds, and those in poor feather, should be removed from the flock.

It is unlikely that the good layer of the yellow skin breeds will possess much pigment at this season; that is, the yellow colour in beak, skin, and leg will have mostly disappeared. The attractive bird shows much new feather and with bright yellow legs and beak should come under suspicion as poor laying ability. Those that cast their feathers early in the season are nearly always poor layers.

Eggs are going to be in greater demand and every effort should be made to keep the flock in profitable production. The mash hoppers should be kept filled with a good, balanced ration in which the meat and fish meal should form fifteen to twenty per cent. of the whole contents. Scratch grains should not be fed too heavily, or the consumption of mash will be less than is necessary to keep up production.

It may be advisable to feed a little of the usual mash slightly moistened with skim milk or buttermilk, and it is well to remember that the whole flock may be thrown out of production at this season by the lack of a clean, cool water or succulent green feed or the presence of mites or lice.

A Public Benefactor

Jack Miner, Canadian Naturalist, Gives Iris Root's Away

All who have visited Jack Miner's Bird Sanctuary know that Jack Miner has the greatest collection of irises to be found on the continent. Men in London, Simcoe and Toronto gave him the original roots. Over a period of years these have multiplied to great numbers.

Each year Jack Miner, to make them bloom well, replants these roots and, naturally, has tens of thousands of bulbs to give away. Instead of commercializing his garden and selling these roots, he puts them into bags and gives them to friends in his county who come after them, and to tourists. The result is that tens of thousands of his choice flowers are the means of starting other gardens.

Jack Miner, commenting on his practice, says he gets a great deal of joy out of motoring through the country and seeing beds of irises in bloom and knowing that he was the means of their being started.

"You can give a bouquet to a friend," says Jack Miner, "but that lasts only a few hours, whereas flower bulbs I am giving away now will be in bloom for the pleasure of future generations, long after I am dead and gone."

No Extra Trouble

The irate parent stormed up and down the room before the nervous-looking young man.

"What!" he shouted. "You have the nerve to come to my office to ask for my daughter's hand? I might as well tell you that you could have saved yourself the journey."

The suitor sighed wearily. "Well that's all right," he said. "You see, I had another message to deliver in the same building."

Situation Was Desperate

The Irishman was relating his adventures in the jungle.

"Ammunition, food and whisky had run out," he said, "and we were parched with thirst."

"But wasn't there any water?"

"Sure, but it was no time to be thinking of cleanliness."

Rather Confusing

"Head" writer on New England newspaper copy desks recently toyed with a word in the line: "Yankee division en-berlin." Those who used it were quick to add in explanation that it was the 26th Division entering the town of Berlin, Mass., during army manoeuvres.

I MADE A SCOLD OUT OF HER!
(UNTIL SHE SWITCHED TO POSTUM)

"She was a loving wife and mother until caffeine-nerves caused by too much coffee and tea gave her a brittle temper! How she could carry on at the children or her husband. But her mother told her about Postum and that was the end of me."

Perhaps you, also, should stop drinking coffee and tea and switch to Postum. If you have headache, indigestion, restless nerves—try Postum for 30 days. You'll enjoy this delicious maltina beverage—and it is very economical. Order from your grocer.

POSTUM

Had Previous Experience

Hitler May Have Forgotten That Stalin Knows Guerrilla Warfare

In taking direct command of the Red Army recently, Stalin re-entered a phase of his career he left two decades ago. He took an active part in the guerrilla warfare of 1918-19, and once served as political commissar of an army of 50,000 entrenched at Tsaritsin. The army was commanded at the time by a broad-shouldered, smiling munitions worker named Voroshilov, to-day the defender of Leningrad. Stalin and Voroshilov proved adept at the business of war-making, and Hitler, who at the time was a corporal, might well have looked up his history books.

Gives Her Toys

As her contribution to the aluminum campaign, Ida Jane Ilman, Orville, Cal., turned in her set of aluminum toys dishes together with two aluminum knives nicely wrapped up in a separate package and accompanied by a note which read, "To carve up Hitler with."

Army's Champion Cook

Private George Swan, 23, member of the Royal Army Catering Corps, is Britain's champion cook. He got first place and a silver medal in a contest, open to the whole country, held by the London School of Cookery.

Very Disrespectful

German Women Do Not Respond Correctly To Nazi Salute

The customary nod of the head and fluttering of the eyelashes is a "painful and disrespectful" acknowledgment by women of the greeting "Heil Hitler." D.N.Z. Nazi propaganda agency, complains.

Referring to women "who have lead in their arms" and do not respond by raising the right arm, the agency said:

"Germans to-day greet one another with the Hitler salutation. There is no other greeting. Whoever doesn't greet in the German way excludes himself from the national community of Nazi Germany."

Couldn't Be Better

Mabel couldn't for the life of her think what to get her best friend for a gift. She kept thinking all the way to the shop but still couldn't hit on anything. She asked a clerk if he could suggest something.

"How about these book ends?" suggested the clerk.

"Just the thing!" agreed Mabel. "She always reads the news before she does the beginning."

"Get my broker, Miss Jones."

"Yes, sir. Stock or pawn?"

Onions come from one of the oldest cultivated plant families.

Democracies Must Offer Definite Large Scale Aid To Russia

London.—Great Britain was said to be striving to convince America that the democracies must offer definite, big scale war aid to the Red Army at the impending "showdown" conference at Moscow among the three biggest anti-Nazi powers, B.U.P. reports.

Britons are pretty well convinced now that the United States is as far away from formal entry into the war as on the day Adolf Hitler invaded Poland, but every day the British are putting fresh effort behind a drive to make Americans aware of what they say is the danger that the democracies will miss their greatest opportunity.

The urgent heat of this drive is illustrated by recent speeches of Prime Minister Winston Churchill, Canadian Prime Minister W. L. Mackenzie King and Foreign Secretary Anthony Eden is not an effort to get the United States in the war, the British say, as much as they would like to see that happen. The immediate purpose, these quarters insist, is to speed maximum American war production.

If maximum production comes too late, they argue, the democracies will have missed the chance to keep Hitler fighting on two fronts and unite against him the resources of three great powers.

Five basic factors were cited by responsible sources as motivating the current British campaign to convince America, as follows:

1 Hitler is once again being permitted to carry out his favorite strategy of pulverizing all real or potential opponents one at a time, always avoiding conflict on two fronts.

2 British and American missions are expected to have a great deal of plain talk when they meet Josef Stalin at the Kremlin, and must be prepared to state what they intend to do in the way of material aid to compensate Russia's huge losses.

3 Britain is unable to take advantage of the eastern front by seizing the initiative on the western front (as Russia desires her to do) on a big scale.

4 American opinion—as illustrated by reaction, for instance to the submarine attack on the destroyer Greer—has seemed to Britons to be unsure of itself since Hitler's attack on Russia.

5 American war production, relied on by British sources to be nowhere close to the production needed

to launch a real offensive against the Nazis and, in fact, is not up to the level of British production despite the smaller capacity here and the employment of several million persons in combatant duties.

At the start of the Russian war, British experts took the view that it did not matter how much territory the Germans occupied because none of the frontier areas was essential to the Red war machine, but now almost every mile counts.

Russia has lost countless acres of grain and factory and ore sectors such as the Dnieper river power centres. New German advances would imperil the vital Donetz industrial basin.

In other words, Germany may never crush Russia, but Russia is now fighting a desperate battle and these sources believe that both Britain and America must awake to the necessity of providing all aid.

At Edinburgh, Sir Kingsley Wood, chancellor of the exchequer, declared that Britain would place no monetary limit on her financial assistance to Soviet Russia, says Canadian Press.

Describing British assistance to Russia as gladly given, he said in a speech that the Russians "have told us they would not wish any such financial help to be provided as a gift, but they have asked for credit insofar as the help we give them is not matched by supplies they send us."

He said Britain was "standing up well" under the strain of a daily expenditure of 12,500,000 pounds sterling (approximately \$50,000,000) and expressed confidence that further taxation in the current financial year can be avoided if inflation is prevented.

A New Flag

Mussolini And Hitler To Give Europe A New Banner

Rome.—Mussolini's newspaper, Popolo d'Italia, writing of Axis collaboration and so-called consolidation of Europe, says metaphorically that the duce and Hitler had given Europe a new blended flag.

"On the battlefield," said the paper, "Mussolini and Hitler have given Europe its new flag in which are blended the colors of all nations of the continent, the glories and rights of all peoples of the continent."

Now this flag is unfurled beside those of the Axis at the head of the armies and fleets of Europe in war."

Russian Resistance Having Devastating Effect On Enemy

London. Russia's northern army is stubbornly holding what appears to be a desperate German attempt to take Leningrad at any cost and register one big victory before winter stabilizes the line for months, military experts asserted.

Wherever the German spearhead might be, despatches indicated that the Germans had been compelled to slow up their main offensives to await replacements for thousands of casualties.

Despatches indicated that the Germans, however close they may have pushed a "spearhead" to Leningrad on the south, actually were heavily involved with strong Russian forces in the Lake Ilmen area 100 miles south of Leningrad.

To the north of Leningrad, it was admitted that the Germans and Finns had made some progress down the Karelian peninsula.

There was less doubt regarding the situation in the central part of the front. There the Russians seemed to have driven the German forces of Field Marshal Fedor Von Bock back some 30 miles at one point on the 175-mile Smolensk-Gomel line and to be attacking tirelessly still.

Marshal Semyon Timoshenko, commander in chief on the Russian central army, was directing what has now become a general counter-offensive.

In the Ukraine, the pressure seemed to have been greatly relieved by the drive of Timoshenko's men on the Smolensk-Gomel line.

Thus Marshal Semyon Budenny, commanding the Ukrainian army, had been given badly needed time to

organize his forces on the Dnieper line, and even to move out forces to feel the German strength on the west bank.

Odesa was reported still in communication with the main Russian forces by sea.

An authoritative British source said German losses in the war with Russia thus far are believed to total about 1,750,000 and that Russian losses have been "from 2,000,000 to 3,000,000" in the bloodiest fighting in history.

This source, in the highest quarters, said:

"None can overpraise the Russians' conduct of the war. They are magnificent and proved the sincerity of their scorched earth promises by blowing up the Lenin (Dnieper river) dam."

He asserted Britain is sending the Russians "all the airplanes we can spare and all the rubber they can use"—two of their most important needs.

The planes are being accompanied by ground crews and skilled aircraft engineers, this source said, but the Russians prefer to fly the planes themselves.

The Russians already are discussing the campaigns of "next spring and August," he said and Britain is confident the Soviet will hold out through the winter with devastating effect on German troops and morale.

The Russians now have 9,000,000 troops in action and soon will be ready to put in 4,000,000 more and have no need for British or American troops.

The Russian army still is the largest in the world, this source said.

Attacked By Sub

U.S. Destroyer En Route To Iceland Drops Depth Bombs

Washington.—An unsuccessful attempt by a submarine to torpedo the United States destroyer Greer, en route to Iceland, was announced by the navy, which said the destroyer counter-attacked with depth bombs, the Associated Press reported. The initial report of this first "shooting incident" of the navy's far-flung activities in the Atlantic did not say whether or not the nationality of the submarine had been determined. Results of the destroyer's counter-attack, it was announced, were unknown. Although the destroyer was said to be proceeding to Iceland with mail, the approximate location of the attack was not made known. Nor did the navy say when it occurred.

The attempt to sink the destroyer "brings us squarely up against the whole question of using the navy's guns to protect American ships and cargoes on the high seas," The New York Times said in a leading editorial.

Saying that the only "real question is whether we shall use our full strength now to increase the power of British arms, or wait to fight it out with Hitler under such terms and conditions as he desires," The Times declared:

"The attack on the Greer ought to help us make our choice. Let us have our showdown while it is still possible for us to have it at our own tremendous advantage."

Control Officer

May Declare Halifax A Protected Area In Interests Of Safety

Ottawa. Commissioner S. T. Wood, of the Royal Canadian Mounted Police, announced the appointment of Superintendent A. N. Eames, R.C.M.P. officer in charge at Halifax. The new post was created by order-in-council approved Aug. 20.

The order said that three months from his appointment he will "prepare a report on the advisability of declaring Halifax a protected area within the meaning of the Defence of Canada Regulations."

Under the Defence of Canada Regulations, any area may be declared a "protected area" if the minister of justice if he is satisfied it is "necessary or expedient in the interests of the safety of the state or the efficient prosecution of the war, to regulate the entry of persons into any area."

Compulsory Training

3,716 Men Called Up In August For Home Defence

Ottawa. Telegraphic returns to the adjutant-general's branch show that 3,716 men called up under the National Resources Mobilization Act during August for compulsory military training and subsequent home defence service were accepted at training centres across Canada, national defence headquarters announced.

Four thousand men were requisitioned. A total of 4,082 men reported and 366 were rejected on medical grounds.

"V" AND THE MAN

Prime Minister Winston Churchill the very personification of the British Commonwealth's "V" for victory campaign, makes the "V" sign in response to cheers as he left Iceland. The visit occurred on the trip that was climaxed by the historic meeting between Churchill and President Franklin D. Roosevelt of the United States.

Nazi Film

Captured From Germans, Now Being Shown In Britain

London. A motion picture film captured from the Germans, and showing the Nazi offensive against Russia, is being distributed in Britain and the government hope it will give the public a shock.

Called "War in the East," the film is shown as a record of the Nazis' most thoroughly total war to date.

The ministry of information has decided that the public ought to see the picture to be jerked out of a complacency which has been worrying British leaders.

The film, a sequel to the German documentary film "Victory in the West," shows monstrous tanks advancing through Russian ruins laid waste by the Soviet scorched earth policy. Death is shown in all its forms. Ear splitting screams of dive bombers punctuate the scenes.

Americans In Ireland

Reifast, Northern Ireland.—The United States technicians who are employed by the British government on defence facilities in Ulster were reinforced by the arrival of 150 persons. There now are about 850 Americans thus engaged in Northern Ireland.

Restores Air Service

Vichy, France has reestablished air mail service to the North American continent by re-opening the Marseille-Barcelona link.

FIRST R.A.F. BOMBING PICTURES—FROM 100 FEET

These pictures give a dramatic record of the sensational daylight air raid on the huge Knapack power station at Cologne, Germany, on August 12th. The R.A.F. bombers flew at a height of less than 100 feet at times. The top photo shows the power station below and one plane (far in background) can barely be discerned between the puffs of anti-aircraft explosions. Much of the smoke was caused by air raid missiles. And then in the bottom photo the same plane descends even lower to get this record of the damage that has been done. Many direct hits were scored. The wing of the plane can be seen lower right.

Believe U.S. Destroyer Greer Either Sank Or Damaged German Sub.

Washington. Indications were that the United States destroyer Greer sank, or at least damaged the submarine which attacked her on the north Atlantic, and for the first time the undersea craft was described as of German nationality.

At the same time, Washington wondered if the navy had been given orders which amounted to a command to destroy on sight any Axis submarine which it might encounter. This purely speculation, grew from the fact that a hunt for the submarine was on, and a suggestion that it would be impossible to distinguish the vessel from any submarine that might be found.

Details of the incident accumulated with the arrival of the Greer at Reykjavik Iceland, to which American defence outpost she was carrying mail.

Despatches from there said the submarine was described in Iceland as German.

Officers and crew members disclosed that British aircraft helped them ward off the attack.

The Greer, they said, dropped many depth charges in an effort to destroy the submarine. At the time they were dropped, the destroyer's instruments indicated that the sub

was directly below in deep water. For that reason, they believed that the submarine might have sunk without a tell-tale trace.

This information was received by the Associated Press in a despatch from Drew Middleton, a staff correspondent and veteran of both the battle of France and the battle of Britain. He had just arrived in Reykjavik from England.

The fact that his despatch was passed by the Anglo-American censorship in Iceland, and coming via England, by the British censorship as well, was considered highly significant.

President Roosevelt himself disclosed that a search for the submarine was on, with orders to "eliminate" it, if it should be found. He made this announcement at a press conference while the capitals of the world wondered what the diplomatic aftermath of the incident would be.

The question universally asked was whether the occurrence would draw the United States into active participation in the war. Although apprehensive, officials here generally inclined to the view that the incident was not of sufficient magnitude to have that result.

Ration Photographs

Shortage Of Materials In Britain Will Limit Portraits

London.—Rationing is being extended to picture studios now. Many have found it so difficult to obtain supplies of photographic materials they have rationed customers to three pictures, stipulating they be of one position only and no proofs can be submitted before ordering.

Because of the shortage, wives and sweethearts are finding it awkward to have portraits taken to send to their men in the forces. Men on leave who wanted pictures of themselves before they rejoin their units have been unable to book appointments.

Appointed Admiral

Prince Albert, Sask.—Ernest Wacher of Prince Albert said he had received word that his nephew, Commander Philip Vian of H.M.S. Cosack, destroyer which rescued British seaman from the German prison ship Altmarrk in a Norwegian fjord, has been appointed an admiral.

For Overseas Service

Some Instructors In Air Training Will Soon Be Released

Ottawa.—Group Capt. J. L. A. de Niverville, officer commanding No. 2 Service Flying Training school at nearby Uplands airport, said he was "authorized" to say that flying instructors in the British Commonwealth Air Training plan soon will be released for overseas service.

"I have been authorized to say that commencing within the next few months the policy will be to release a proportion of flying instructors for overseas service month by month," he said.

Cheques For Dependents

Ottawa.—Dependents of Canadian (active) army and Royal Canadian Air Force personnel were issued 218,000 cheques totalling \$11,500,000 during July, figures issued in the last monthly statements of the dependents' allowance and assigned pay branch of the comptroller of the treasury's office announced.

Expansion Of British Army Is Planned For Spring Offensive

London. Expansion of the British army to the utmost limits of Britain's manpower available in prospect with a view to forcing Germany to fight on two fronts next spring.

The Daily Herald said that the high command had determined to call millions of men up for service because of strategic decisions made as a result of developments of the Russian campaign.

Some quarters doubted whether "millions" are available for service because of the great needs of Britain's war industries. However, there appeared no doubt that preparations are under way for a continental counter-attack if spring conditions are favorable for such a venture.

Total available manpower, including men registered for service up to 40 years of age, is estimated at 6,250,000. However, the army is able to call into service only men in dispensable occupations or in "posts" where they can be replaced by women.

Prospect of an actual spring continental offensive, it was thought here, depended largely upon United States and British arms production in the next three months. Arms and ammunition in huge quantities must be produced before any major operation could be undertaken. However, the British might take the initiative in North Africa.

The present British army is estimated at about 4,000,000 men, including 1,500,000 home guards. Canada now has nearly three divisions of fighting men in the British Isles. Arrival of another large contingent of Canadians, bringing the Third Canadian Division close to war strength, was announced.

Orders have been issued for the

calling up of 500,000 women to essential industries. This would release an equivalent number of men for military service.

Unofficial observers likened the British situation to that of the Allies of 1918 when for the first time a "line of equilibrium" had been established along which it was possible for the Germans to be contained. This, it was noted eventually, led to development of Allied offensives.

It was disclosed that Britain has been moving toward mustering its maximum manpower for two months, and it was considered that the disclosure of the intention continue calling men was linked with the withdrawal of German units from France, Holland and Belgium to replace severe losses on the eastern front.

There have been no special calls for an unusually large number of men it was emphasized. The government was represented as proceeding on the principle that no fit man should be excused from military service if his job could be filled by a woman. The government recently issued a call for 500,000 women to replace men in factories.

The Daily Herald report, passed by British censors, could hardly on its face mean anything, if correct, other than that British planned to raise a huge army for continental service, the land offensive against Germany which, according to many experts, alone will defeat Germany.

The government's plan, the newspaper said, would principally affect men up to 40 years of age in reserve occupations.

Training and equipment of an enlarged force is being given top place in the government list of war priorities, it was said.

CANADA'S WAR EFFORT

IF doubts exist in the minds of westerners that Canada's not making an all-out effort to help Britain win the war, a visit to Eastern Canada quickly dispels it. The writer was recently one of a party of newspaper publishers who for eight hectic days toured Ontario, Quebec and New Brunswick and Nova Scotia, visiting munitions plants, shipbuilding yards and military training centres, finishing up with a day at Halifax as the guests of the Royal Canadian Navy, whose hazardous work of convoy duty excited admiration for the work they are doing in conjunction with the British Navy.

IMMENSE plants are working three shifts a day to keep up the stream of supplies. The home front is equally as important as the fighting front, perhaps more so, for sailors and soldiers cannot carry on without the implements of war. That is why strikes and slow-downs are so dangerous to the cause, for there should be no shirkers in this war if we are to preserve our mode of life against tyranny and Godless living. The young men we saw in the various training centres such as Brantford, Petawawa, Debert, and other training bases, inspired us with their studious enthusiasm to prepare themselves for active service. Army training is vastly different to what it was in 1914-18. The private soldier as well as the officer has to depend on his individuality and initiative to a far greater extent. We had hoped to see some of our local boys while visiting the various centres, but owing to such hurried visits little time was allowed to look up individuals, or else they were out on exercises.

HUNDREDS of girls have taken the place of young men in the munitions plants, where working conditions are made as comfortable as possible. Particularly in the production of small arms ammunition is the work of the girls greatly in evidence, and in their blue uniforms they seem to take pride in the fact that they are engaged in war work, though it does entail eight hours of standing or sitting at a machine on a routine job. The industrial east is humming with war activity.

IMMENSE areas are given over to enable operations to be carried on under active service conditions, and it was here that the effectiveness of armored units, tanks, and motorized artillery was seen. Little wonder that Hitler made such rapid advances under such methods. Tanks, guns, shells in ever increasing numbers are pouring out of eastern plants, impressing one with the stern realities and necessities of modern war to meet Hun frightfulness.

CURVETTES, minesweepers, bombers for the air force, all were seen in course of construction, and it made one realize that a mighty effort is being put forth and paid for by a comparatively small nation of approximately eleven millions of people. Yet the effort must be maintained, the same as the "little people" in Great Britain are measuring up to the job in war production. It's a travesty that this should be necessary in a so-called civilized age, yet if you have a mad dog attacking you, the only method of defence is to knock him out as quickly as possible, and render him incapable of further harm.

ACCLIMAX to the eight days' tour was the day with navy. Historic old Halifax is the focus point for war supplies and troops. Here we were given an insight into the perilous work of the sailors who not only man the warships, but those gallant merchant marine officers and men who face death every time they leave port for the other side of the Atlantic. After lunch on that battle scarred destroyer, H.M.C.S. Restigouche, we were divided into two parties, and went to sea on a four hours' trip on two of the destroyers which were turned over by the United States to the British Navy. These swift vessels are manned by Canadian crews, and employed in convoy duty. The thrill of depth charges was experienced, and the effectiveness of a smoke screen was seen, behind which warships can manoeuvre. A pleasing incident was a dinner given in Admiralty House in the evening as a conclusion to the day with the Navy, when we met Rear Admiral Bonham-Carter, of the British Navy, and Commodore Jones, of the Canadian Navy. And what do you think was uppermost in the British admiral's mind in the course of conversation?—a baseball game which he had seen that day and over which he was very enthusiastic. It showed that even admirals as well as able seamen are as equally interested in sport and rather than talk shop will talk of everything else. Such is the spirit that animates our fighting forces. Their morale is "top hole." We who are not in the fighting forces should be willing to put forth every effort we can to back them up to ensure victory. To give them the tools we must raise the money to pay for them.

Tips for Motorists on Gasoline Economy

Automotive experts hints to Aid Government Campaign

For the Canadian motorists who sincerely desires to save gasoline and oil in the operation of his car or truck, thus co-operating in the Dominion Government fuel economy campaign, certain simple rules are available.

The following list of driving tips has been compiled by C. E. McTavish, Director of Parts and Service, General Motors Products of Canada Limited, after consultation with General Motors engineers and service experts. These hints are offered by Mr. McTavish to the Canadian motoring public, with his comment that a maximum of economy is built into the modern automobile but that there are certain things that the motorist himself must do to eliminate avoidable waste of gasoline and oil. Here is the list:

1. Accelerate gently. A fast get-away may be spectacular, but it wastes gasoline.
 2. Do not stay in second gear beyond 20 m.p.h. Roaring second gear speeds devour large quantities of fuel.
 3. Start to decelerate a sufficient distance from your stopping point to allow the momentum of the car to carry you along with a minimum use of gasoline.
 4. Drive at moderate speeds. Remember the best economy is obtained at speeds 25 to 35 m.p.h. The faster you drive above this speed the greater the requirements of fuel and oil per mile.
 5. Keep your engine tuned up for the best efficiency. Dirty spark plugs can waste one gallon of gas for every ten used. Tightly adjusted valves not only cause burned valves, but result in poor fuel economy. Ignition points properly adjusted, and ignition properly timed, will give you the best performance and greater fuel economy.
 6. Keep your car well lubricated. Keep the tires inflated to the proper pressure. Make sure the parking brake is in the completely released position. In other words, let your car roll freely.
 7. Don't let your engine idle more than is necessary. Even an idling engine consumes gasoline.
 8. Do not postpone a necessary engine overhaul. Worn rings drastically reduce engine power, and result in more oil and gasoline being consumed.
 9. Watch the choke, especially if it is manually operated. Don't forget to push it to the "off" position as quickly as possible after starting a cold engine.
 10. Avoid pumping the accelerator up and down. This pumps a slug of gasoline out of the carburetor every time you make a downward motion.
- In conclusion, attention is drawn to another fuel waster. Don't overfill the gasoline tank. The gas station attendant naturally wants to put all the gasoline he possibly can in your tank, but quite often he will spill some (for which you pay) in trying to get that last quart in. And remember that gasoline expands with heat, and if you park your car in the sun with the tank full, the expanding gasoline has got to go somewhere and that will be out of the gas tank vent.

TO CALL CONFERENCE ON TOURIST TRAFFIC

A Dominion-wide conference on tourists traffic will be held in Ottawa, October 20-22, it was announced by Walter P. Zeller, Executive Assistant to Hon. J. T. Thomson, Minister of National War Service, to-day, following a meeting of the newly appointed Advisory Committee on Tourists Industry. Representatives from the nine provinces, the Canadian Association of Tourist and Travel Bureaus, the transportation companies, Chambers of Commerce, Boards of Trade, and other important organizations interested in the development of the tourist industry will be invited to attend. This conference is to be held because of the increased importance to Canada's war effort of the tourist industry, particularly as a vital feature in the Dominion's financial economy. Methods by which tourists traffic may be developed and the fullest possible co-ordination effected between all agencies engaged in the tourist industry, will be carefully discussed.

Before the next meeting of the Advisory Committee on Tourist Industry, it is expected that an additional member, probably a French-speaking Canadian, will be appointed to it. The Minister of National War Service is now giving consideration to a number of recommendations which have been made in this matter.

Scanlan in Buffalo Evening News: Cheer up, Some day we may have city officials zealous enough to see how much of the taxpayers' money they can save—not how much they can spend.

GOOD BUSINESS TO SUPPORT HOME INDUSTRY

Often local stores and offices are solicited by salesmen of printed matter from outside firms. It should be remembered purely as a matter of business interest that if labor is kept steadily employed in your own home town, it is much better for all concerned

than giving work to those who take no part in local affairs and pay nothing in taxes or revenue to local utilities. The printing industry is an asset to Coleman as are all other small industries doing business here. They help to make a town a centre of activity, therefore it is always good business to encourage the development of home industry.

Local News

Mr. John Williams is a hospital patient.

Mrs. Russell Ferguson is a hospital patient.

Pte. Fred Lees left last week for his company located at Kingston.

Miss Gladys Moores is the guest of her parents, Mr. and Mrs. Sam Moores.

John McGregor left on Tuesday for Calgary, where he will report to R.C.A.F. authorities.

Ellis Derbyshire left last week for Calgary, receiving his call to report to the R.C.A.F.

Harold Kane, of the Canadian Navy, spent a short furlough at his home here last week.

Mrs. J.R. Cousins and baby have moved to Edmonton where they have taken up residence.

Mrs. Fred Brown and children, of Kimberley, are the guests of Mr. and Mrs. Wm. Fraser, Jr.

Mr. and Mrs. Lloyd Sanderson and baby and Mrs. O. Smith are visiting Mr. Sanderson's parents in Saskatchewan.

The Misses Grace Birarda and Annie Kulig have returned home following a month's vacation at Cranbrook and Kimberley.

Pte. M. McMullen was home visiting his family last week. He is now stationed at Kingston.

Mr. Hugh Dunlop, holder of ticket No. 84 was the winner of the quilt raffled by the L.O.B.A.

Mrs. White, of Pincher Creek, is the guest of her son-in-law and daughter, Mr. and Mrs. W. Read.

Mr. and Mrs. John Anderson and John, Jr., have been visiting relatives at Edmonton for the past two weeks.

St. Alban's Ladies' Guild will sponsor their annual Fall Sale on Saturday, November 8. Please reserve this date.

Ivor Morgan, of the R.C.A.F., at Edmonton, has been visiting his parents for the past week. He left for Edmonton on Wednesday morning.

Gnr. Steve Myssyniuk, of Camp Shilo, Man., is spending a short furlough with his parents, Mr. and Mrs. A. Myssyniuk, of West Coleman.

A Plymouth coupe, driven by a Bellevue youth, was badly damaged on the main highway between Blairmore and Coleman on Sunday afternoon. A blow-out of the right rear tire was the cause of the accident.

Mr. and Mrs. James Naylor visited at Lethbridge during the weekend, where they visited their son Bill, who is with the R.C.A.F. in that city.

Mr. and Mrs. Dave Robert, Margaret and Ronnie, motored to Banff last week. Miss Margaret continued on to Edmonton, where she is the guest of friends.

Ptes. Bill, Fred and Jesse Hirst, Jasper Jones and Tom Sudworth, of Coleman and Jim Connors, of Bellevue, were home visiting their families last week. They left at the week-end for Petawawa military camp.

A staff list received from the Macleod school division reveals that Miss Ruth Sudworth has a position on the staff of Boyne school near Vulcan; Miss Alma Wilson in the Harper school near Staveland; Miss Winifred McIntyre is in the Northern Light school, near Claresholm, and Miss Mary Graham has a position on the Roselawn school staff near Granum.

TOURIST TRAFFIC LAGS BEHIND 1939 FIGURES

During the week ending August 23, 38,091 sixty day automobile permits were issued at border points to tourists entering Canada, according to a statement issued today by Walter P. Zeller, Executive Assistant to Hon. J. T. Thorson, Minister of National War Services. These figures are based on reports received from fifteen border points and represent better than 75 per cent of the total border traffic for the week.

While these figures show an increase over those of the corresponding week in 1940 when 29,409 sixty day permits were issued, they are below the corresponding week of 1939 during which the permits totalled 42,540.

Windsor, Ontario, which for the week ending August 16 showed a slight decrease in tourist traffic as compared with 1940, last week reported a substantial increase. Windsor figures for the week ending August 23 were 9,339 as compared with 6,951 during the corresponding week in 1940 and 11,403 during the corresponding week in 1939.

The total number of sixty day permits for the week ending August 16 of this year were 39,330 as compared with 33,372 in 1940 and 59,941 in 1939.

The Canadian National Institute For the Blind

Annual Report—Calgary Branch—For Year Ending 31st March, 1941.

Never before have so many done so much for the blind living within the area served from this office. To interest more and more people in Institute work is one of our chief aims, and we will not be content until the abbreviation C.N.I.B. is instantly recognized by all who see it as the major blind welfare organization in Canada. To our sighted friends "seeing is believing" and the increasingly large number of callers we have had must account for the additional interest being taken in the blind in this district. We welcome visitors and know full well it is their good word spoken in season that promotes our advancement.

To have every blind person in Central and Southern Alberta registered with us has long been our objective. To the best of our knowledge this has now been achieved, and we endeavour to give each and every one the services best fitted to their individual needs. Thirty-one additional names registered during the year, and twenty-seven removed from the files through death and transfer to other branches, leave us with a

slight increase in registered blind clients. Blindness in the majority of these cases is due to old age. In our territory we report with satisfaction we have been entirely free of accidents causing loss of sight.

Under Prevention of Blindness, services have been extended to seventy-five children and adults, and twenty-five persons formerly served have been assisted under our follow-up policy. Services extended to these clients included transportation, examination of eye condition, an occasional operation and the supplying of glasses.

In recent years under our Prevention program, normal or a useful degree of sight has been restored in the majority of the 430 cases served.

Sales of blindcraft for the year were most encouraging and reached a new high of \$5,161. Of this amount: \$2,116 was realized from and we congratulate Mrs. Huckvale and her assistants for their sales conducted by the I.O.D.E., expert salesmanship. Naturally this increase in sales resulted in a corresponding increase in cash benefits to blind workers. We note with interest that blind persons living in rural areas are taking a more active part in the making and selling of blindcraft articles.

Profits of \$5,389 were earned and disbursed as wages to seven blind operators of news and tobacco stands which are sponsored and supervised by the Institute.

We congratulate the officials of the Community Chest of Calgary on the success of their first consolidated appeal, and we are most grateful to them and to subscribers for providing the funds which enable us to carry on. Individuals living outside the City and Councils of cities, towns, villages and rural municipalities responded generously to our annual appeal for financial assistance and we record our thanks for their interest, their confidence and support. We are indebted to the members of all Service Clubs who never failed to accede to our many and varied requests.

In closing your Executive Officer and his staff wish to pay a tribute to members of the Board of Directors for Southern Alberta. Their kindly consideration of the problems we present for their decisions is most helpful and their capable direction of Institute business as well as their keen interest in those whom we serve ensure still further progress in the year that lies ahead.

Respectfully submitted,
ROY P. THOMPSON,
Executive Officer.

Daily Oklahoman: There is no advance information where the next sidown strike on a defense project will be staged, but the opinion of the experts is that it will not be staged anywhere near to a camp of United States Marines.

MEMBERS OF PARLIAMENT IN BRITAIN'S HOME GUARD

British Members of Parliament who are in the Houses of Parliament Home Guard attend a War Office school for Home Guard officers. There they see demonstrated, and use themselves, every type of weapon issued to the Force. In this picture Members of Parliament are throwing anti-tank fire bombs.

WORLD HAPPENINGS BRIEFLY TOLD

The British food ministry announced it is considering the importation of Canadian apples.

Stephen Henry Horgan, 87, inventor of the half-tone engraving process, died recently at Orange, N.J.

The University of Leningrad opened on schedule Aug. 31 with 3,500 students enrolled for the fall term. The usual five-year course has been cut to three.

Preliminary reports on fall and winter shoe prices indicate there will be no general increase in retail prices this year, the wartime prices and trade board said.

Lady Edward Spencer Churchill, great-aunt of the prime minister, was killed and her daughter, Beryl Lady Cowdray, was injured in an automobile accident.

The Norwegian minister of interior ordered all vital Norwegian plants and warehouses to establish company defence corps to guard against deliberate damage.

Six members of a sideshow company which played at the Canadian Pacific exhibition in Vancouver didn't return to the United States with the show. They joined the Canadian armed forces.

An Exchange telegraph despatch from Goeteborg, Sweden, reported that four tons of powder and other war supplies were blown up by saboteurs at a powder works near Drammen, Norway.

The British Press Service said that "The Economist," London financial weekly, estimated property valued at \$480,000,000 was destroyed in Great Britain by bombers during the first two years of the war.

Britain's citizens' advice bureau, established in 1912 centres, have answered their 1,000,000th question. The questions handled by the bureau range from rent and rations to debts and child adoption.

Have Left For Britain

Reports From Norway Say 70 Fishing Boats Are Missing

According to reports from Norway, some 70 fishing boats disappeared from Alesund during August and with them hundreds of Norwegians. Search for them is being made, but it is obvious that the boats and the Norwegians have left for Britain.

Similar reports of attempts of Norwegians to make their way to Britain have come from other parts of Norway. The authorities have taken action in reprisal against the relatives of the departed citizens whose property is being confiscated.

Some Names Would Help

But Air Force Objects To Mention Of Individual Airmen

The Royal Air Force feels that team play is what counts and that individuals must be played down. But the use of a few names here and there to give life to the reports and inspiration to those at home is hardly likely to mar any team play. We have seen it in hockey and football. Frank Nighbor and Red Batstone were probably the best team-players we've known, yet they were the idols of the fans as individuals—and what are our Canadian airmen but athletes answering a higher call?—Ottawa Journal.

Chose Wrong Store

With Long Chance In His Favor Thief Loses Out

With the chances about 8,000,000 to one in his favor, Louis Van Den Borren lost and was sent to jail at Brussels, Belgium, for a year.

Van Den Borren, an ambulance driver at Ypres, took a wrist watch from a man's body he was transporting.

He gave the watch to a friend who took it to a shop to exchange for a woman's watch. Out of about 8,000,000 persons in Belgium, the clerk was the man's widow. She recognized the watch.

Lost A Stripe

Sgt. Michael Cassidy, a big St. Bernard, named after the first Canadian soldier killed overseas in the first great war, lost a stripe—his army penalty for leaving Camp Shilo, Man., for several days.

Southernmost point in Canada is Middle Island in Lake Erie.

Good Story From Cairo

Australian Soldier Had Own Idea About British Lion

On leave in Cairo, an Australian soldier viewed the lion, but resented the cage.

While his mates watched, he sneaked round to the back of the cage and let himself into the sleeping quarters. In a few minutes he had established good relations. Then he opened the door, and the two of them went for a stroll around the grounds.

"You should have seen the people scatter," said one of his pals in a letter home. "We asked him why he did it, and he said the British lion should never be caged!"—Australian Press Union.

Good Saver Of Gas

Old Model One-Cylinder Car Averages 30 Miles To Gallon

Massachusetts gasoline conservators cast an approving eye on the 1904 model one-cylinder automobile in which Mr. and Mrs. George C. Green, of Lambertville, N.J., drove to Boston. Green says it chug-chugs no more than 25 miles an hour and averages 30 miles to the gallon. It has travelled to California, Mexico and Canada without mishap.

Every hour 1,142 persons are accidentally injured in the United States.

Equipment Of Fire Watchers

List Shows Londoners Still Have Their Sense Of Humor

The following humorous item from Old London is clearly indicative of the fact that Nazi air raids have not been able to dim the courageous spirit of that great city. This notice is supposedly issued for fire-watchers, a gallant company who have played a large part in the defeat of the "blitz." 1—Belt to go round waist with ten hooks to support six full sandbags and four buckets of water. 2—One axe stuck in belt. 3—One stirrup-pump to be carried over left shoulder. 4—One one-hundred lb. ladder to be carried over left shoulder. 5—One long-handled shovel to be tucked under right arm. 7—Two wet blankets to be carried on head. 8—One tin hat with turned-up brim to carry spare water. 9—Spare box of matches to light any incendiary that fails to ignite.

An All-Time High

Canadian employees were reported by the Dominion Bureau of Statistics to have added 77,500 employees to their payrolls in the period between May 1 and June 1, topping all previous records in an advance which was regarded as reflecting a new all-time high in industrial activity.

Praise is due the man who makes good when conditions are bad.

Proper Care Of Tires

Half Of Tire Life Sacrificed By Driving Underinflated Tires At High Speeds

With the interest of Canadians focussed on the conservation of rubber as a factor of extreme importance in our nation's defense program, Firestone development engineers have drawn upon their fund of research facts and figures to show motorists how they can conserve thousands of pounds of rubber annually, and at the same time, cut their own operating costs materially by increasing the life of the tires on their cars. As shown by the records of thousands of miles of testing, the two most serious causes of excessive tire wear are incorrect inflation and high speed driving.

A check of the air pressures in the tires of hundreds of owners' cars has revealed that underinflation is the most prevalent cause of wasted rubber on the streets and highways. While it is generally known that underinflation of tires is commonplace, few realize the rapidly or extent of the damage suffered by an underinflated tire. This is exemplified by a comparison of tire mileage returned by identical tires on identical cars operating at varying degrees of underinflation.

EFFECT OF INCREASING SPEEDS ON MILEAGE LIFE OF TIRES

Tread rubber wears out at a normal rate at 30-mile-an-hour average driving speeds. Higher speeds burn up the rubber faster, thus reducing mileage life of tires. To help motorists conserve rubber for national defense needs, tire development engineers of The Firestone Tire & Rubber Company are releasing the above data to show that excessive wear at 40 miles per hour is equivalent to a waste of 22 per cent of the normal tread mileage. At 50 miles per hour, the waste rubber is almost double that sacrificed at the 40-mile-per-hour speed. Normal speeds mean normal wear and low mileage cost of tires.

EFFECT OF UNDERINFLATION ON MILEAGE LIFE OF TIRES

*Recommended Air Pressures vary according to the size of tire and weight of car. 30 lbs. is used for illustrative purposes. Underinflated tires are responsible for more wasted tread rubber than is any other single cause. To assist motorists in conservation of rubber for national defense needs, tire development engineers of The Firestone Tire & Rubber Company have compiled the above data to show that maximum wear can only be assured when tires are kept properly inflated at all times. If a tire with 30 pounds of recommended pressure is run at 27 pounds pressure (10 per cent underinflation), almost one-fourth of normal tread mileage is sacrificed. A tire that is 9 pounds underinflated wastes one-half of the tread rubber.

CAPTURES SILVERWARE

Loaded with silverware which she picked up at the Banff Springs Hotel in Banff's 12th annual golf week, August 24-30, Mrs. Dorothy Sothern, New York, is seen on the 18th green of the Banff Springs course. Mrs. Sothern defeated Mrs. Pearl Cumming of Vancouver five and four to win the big Chateau Lake Louise event, and picked up other prizes in medal score event.—C.P.R. photo.

Feeding An Army

Gigantic Amount Of Foods Consumed By Various Forces

Take all the men in the navy, army and air force and you have a whole of an appetite. Food? Here's a list of major food purchases by the general purchasing branch of munitions and supply department during July.

Potatoes, 6,000,000 pounds; bread, 1,200,000 pounds; beef, 3,400,000 pounds; fresh vegetables, 2,500,000 pounds; evaporated milk, 1,000,000 pounds; butter, 800,000 pounds; bacon, 700,000 pounds; cheese 400,000 pounds; coffee, 120,000 pounds; tea, 100,000 pounds; and eggs, 500,000 dozen.

To help stow the grub away the barracks stores division ordered an additional 150,000 knives, forks and spoons.

Clothing ordered in July amounted to \$8,000,000; cloth, \$3,000,000; agricultural equipment, \$1,000,000; and fuels, paints, lubricants and electrical supplies, \$30,000,000. Mechanical transport orders involved "many millions of dollars," the defence department said, and negotiations are under way for materials valued at more than \$20,000,000.

To keep the army and its quarters clean the barracks stores division ordered 500,000 bars of soap, 30,000 mop cloths and 200,000 tins of cleaning powder.

Bad For The Nerves

Tip For People Who Leave Advertising Matter In Cars

We don't mind merchants decorating our car with advertising bills while it is parked on Talbot street, says St. Thomas Times-Journal, because it is really no trouble to toss the bills away as we climb into the car. But we wish they wouldn't place those small white blotters under the windshield wiper. It always gives us a nervous shock whenever we see one against the windshield of the puddle-jumper. Until you get close those advertising blotters look just like police department parking tickets.

Sees End Of Chinese War

General Chiang Kai-Shek Predicts The Finish Next Year

In a message arriving at Singapore from Chungking, Gen. Chiang Kai-Shek predicted that the war with Japan would end next year and thanked Malaysia's 2,500,000 Chinese "for help which enabled me to carry on the war for so long."

Chinese Malay leaders meanwhile designated one week as "Britain Week," during which they raised money for the Lord Mayor's Fund and held mass meetings to display loyalty to their adopted land.

The north pole lies in a depression while the south pole has an altitude of 10,000 feet. 2428

SUNDAY SCHOOL LESSON

SEPTEMBER 14

THE ETERNAL GOD, THE SOURCE OF HELP

Golden text: Holy, holy, holy is the Lord God, the Almighty, who was and who is and who is to come. Revelation 4:8.

Lesson: Revelation 7:9-17. Devotional reading: Isaiah 41:8-14.

Explanations and Comments

The Worshipping Multitudes, Revelation 7:1-8. Great and terrible judgments have been announced in this Book to the number of six, and they have increased in range and intensity. Before the seventh John gives a beautiful vision of the redeemed, in words intended to reassure the faithful who are not to be harmed in all the dreadful destruction.

At the four corners of the earth there were four angels holding back the four winds, 7:1-8. The Jews considered the winds from the four corners harmful. Here the angels seem to represent the forces which are to bring devastation on the world. But another angel, rising from the east (whence comes the life-giving sun), orders the four angels not to loose the winds nor hurt anything until the servants of God have been sealed, or protected, against evil. All God's faithful ones were gathered, a vast company quite impossible to count (The number a hundred and forty-four thousand signifies completeness), from all tribes and people and tongues—a tautology of emphasis.

"One of the great characteristics of the Church in the first century was its evangelistic zeal. It was a church in of fact to proclaim the Gospel of Christ. Friend spoke to friend, neighbor to neighbor, the soldiers and tradesmen to their fellows. The Good News was told in field and market, in the home and on the street. Jesus had proclaimed his Great Commission, and his followers had obeyed. Added to this oral testimony was the patient bearing of persecution, the patient standing before the throne and living, all these combined bore such eloquent attestation to the power of the gospel that it was irresistible. Thus it was that Christianity spread so rapidly in those early days. Thus it was that the Seer of Patmos could behold the vision of a great multitude standing before the throne and before the Lamb" (Cady H. Allen). Life before the throne of God, observes Dr. Swete, is life wherever present if it is dominated by a joyful consciousness of the Divine Presence.

TOTS' CRISP BUTTONED STYLE

By Anne Adams

This pert little dual-personality style keeps up with the busy pace of a small girl's life. For Pattern 4708 by Anne Adams is designed in two different versions. One is in the peasant trend, with a square neckline and rick-rack edging. The other version is more tailored, with a trim collar. That front buttoning lets mother dress a restless youngster quickly and it makes the frock easy to open out for laundering. The skirt is flaring; the front waist-seams are shaped in spirited points. Either version may have its entire top, with the exception of the button panel, in ray contrast. A pair of neat panties is included in this "must have" style.

Pattern 4708 is available in children's sizes 2, 4, 6, 8 and 10. Size 6, collarless dress, takes 2 1/4 yards 3 1/2 inch fabric; dress with collar, 1 1/2 yards 3 1/2 inch fabric and 1/4 yard contrast.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Company, 175 McDermott Ave. E., Winnipeg, Man.

On the average the moon rises 50 minutes later each day.

HEALTH EDUCATION

A review of the work accomplished by the St. James-St. Vital Health Unit, Manitoba, published in a recent issue of the Canadian Public Health Journal, shows that this experiment in public health service has finished its first ten years as a decided success.

Besides home nursing and popular educational work undertaken by the unit, which serves two municipalities of Greater Winnipeg, regular inspections of school children of the districts are made and cases of disease weeded out.

In areas not served by the Greater Winnipeg Water District, all wells are rigorously and frequently examined. In some cases wells have been condemned and sealed.

The unit sees that all dairies and milk vendors are licensed, and that dairies are inspected regularly and made to comply with the health regulations. All cattle in the area are regularly tuberculin tested by the unit. Inspections of all lunch counters in the area are made at regular intervals.

With the assistance of the Laboratory of the Provincial Department of Health, and the Central Chest Clinic, urinalysis, blood counts, and X-ray examinations are made in cases where they are required, and cases of several diseases are referred to the Government Clinic.

Immunization against preventable diseases has become one of the most important activities of the unit. As a result, diphtheria cases in the district declined from 28 in 1931 to 3 in 1939.

Child welfare and dental clinics, first aid treatments, and administration of medical relief are other activities of the unit, which covers an area of 50 square miles and serves some 24,000 of population.

Cost of maintenance for 1940 was \$14,000, a per capita expense of only 59 cents.

Capacity Of Burma Road

Far In Excess Of Estimate States Veteran Truck Driver

The potential capacity of the Burma Road is far in excess of the usual estimate of 300,000 tons a month, according to Daniel Arnstein, veteran American truck and taxi operator, who arrived in Chungking after completing a survey of the road for the United States Government. Mr. Arnstein declined to name a ceiling for the Burma Road tonnage. "It's a good road," he declared, "and its capacity with efficient operation is practically unlimited. It is possible in the future that the Burma Road capacity will be limited only by the capacity of the Port of Rangoon."

Few Volunteers

Major Vidkun Quisling, Norwegian Nazi Party leader, is reported by a Stockholm source to be planning stern action to obtain 3,000 volunteers to fight with the Germans against Soviet Russia. Quisling promised German occupation authorities that number of men some time ago, but his recruitment has fallen far short of the goal.

The Greeks who lived in the first century B.C. knew that the moon caused the tides.

Parts of the Flying Fortress bombing plane come from 248 different factories.

DAUGHTER OF DESTINY

—BY—

Eleanor Atterbury Colton

CHAPTER XXIII

Talbot sent the copy of his play the next day. The bulky package was waiting for her when she went to work that afternoon. And Talbot himself appeared later that evening, sat waiting for her at the little table behind the potted palms, his thin face eager, his voice husky with excitement.

"Have you had time to read it, yet, Devona?" he asked the moment she slipped into the chair opposite him.

She shook her head. "Not yet. I've saving it until I get home. It's too noisy here."

"I hope you like it." His eyes pleaded shyly from behind his surface hardness. "Though you probably won't understand what I'm driving at. Nobody does, really."

"I'm sure I will," slipped her own warm hand over his cold one as if to protect him from the fear she knew hovered over him like a pall. Then, realizing what he wanted, needed to talk about it, she asked, "How did the rehearsal go last night?"

"Not bad. Vana's magnificent. Some of the support is pretty foul. Dale thinks he can round out the cast better once we get it to New York."

Dale! The name like a banner unfurled. It was the first time Tal had mentioned him. Desperately, she checked the tremor that raced through her.

"How is Dale?" she tried to ask naturally.

"Oh, fine. Working like a dog. I don't see much of him. Too busy—both of us—to be civil, I guess. We live in the same house and that's about all. He shows up after rehearsals usually and takes Vana home. She depends on him a lot, too. Good business man, Dale. Good level judgment. Don't know what we'd do without his advice. Owe everything to him."

Again—Vana and Dale. Tortuously, her imagination conjured up the picture—leaving rehearsals together, Dale's splendid height, Vana's dainty pettiness, the powerful coupe, supper just for two somewhere. Drawing a deep breath, she steadied her voice. "Dale's doing very well in his work, isn't he?"

Tal nodded. "He's got something. Devona. And they're finding it out at last down there at the D.A.'s office. They know it in other spots that don't make it too healthy for Dale, too," he added gravely. "If they just don't bump him off. That's what worries me. He goes to the source of supply for his evidence and his witnesses, you know. That's not exactly—safe."

Inside INFORMATION

Inside all Burgess Batteries is much more of the active electric energy-producing material than in other makes. That's why Burgess Batteries last longer and save you money.

ASK FOR BURGESS BATTERIES With the Black and White Stripes

Devona nodded. This was awful—listening to Tal, getting a close-up picture of Dale's life. And yet she had to listen.

"He's had one threatening letter already that I know of. And he won't let any of the staff be seen with him on the street for fear of endangering somebody's life besides his own."

"A letter!"

"Under our front door, one night I found it. Some crackpot had written 'I lay off—' or else." No signature. No envelope. Not even fingerprints. Dale had it checked.

"And did he? Lay off, I mean?" Tal laughed. "Dale? He? He turned around that very night and went back to the office. Worked until daylight."

It was late and dancers were already leaving the floor, crowding around the bar for a last round of drinks. It left Devona and Tal almost alone, circling slowly, in perfect step to the dreary music.

"You're a swell dancer, Devona," Tal smiled down at her once as they waited for an encore. "I always said that, didn't I?"

"You're no slouch, yourself," and when he drew her back into the circle of his arms, realized that this was the first time she'd really enjoyed dancing since the night Dale had Vana—

Then she noticed Macias glowering at her from the door of his office. Instantly, her own fears began sharpening at her pulse. His jealousy, so quick to ignite, so white-hot.

"What's the matter?" Tal asked, sensing the change in her.

"Oh, nothing." After all, this was part of her job—dancing with patrons. No reason for Macias to look as if he'd

But Tal had followed her glance. "Who is the handsome guy with the soup?"

"Mr. Macias, you mean?" she asked casually at least she hoped it sounded casual. "Just the owner of this place—and my boss."

The dance ended and Tal led her back to the little table.

"Why are you afraid of him?" he asked abruptly.

Startled, Devona stared at him. Was her expression that transparent?

"Why do you ask that?"

"It's true, isn't it? You're scared to death of him?"

She forced a laugh. "Don't be ridiculous. Why should I be?"

"I'm sure I don't know," Tal searched her face. "But you are, and I still say this is no place for you."

Turning his chair so that he could watch Macias, Tal went on calmly. "I don't like this set-up. I'm going to get you a job somewhere else. Let me go tell that guy you're leaving right now. Will you?"

"Oh, no. Please." A detaining hand on his arm. Devona drew him back into the chair from which he'd half-risen. "Where else could I find work? I can't really offer you anything except the kind of singing they like here. Besides, Macias wouldn't let me go. My contract—"

"To hell with your contract," Tal cursed furiously. "And now who needs scolding about being your own worst enemy?"

"Please. I'm all right. And really you'd better go now," Devona begged, frantically.

He hesitated. Then, reluctantly, "Okay. I'll beat it now—but—"

and one finger under her chin, he tipped her face up, smiled at her affectionately. "I'm getting you out of this place just the minute I can find something to offer you. Understand."

In that moment, Devona did understand—perfectly. Perhaps better than Tal himself. She saw it plainly in his eyes, heard it in the depths of his voice. He was falling in love with her. Like the shock from an electric charge, the knowledge smashed into her mind. And in the same instant, she realized she mustn't let him discover that love. He mustn't love her. Not that!

"I'll be back," he was saying now.

"Take care of yourself in the meantime."

She nodded. "Good night." Troubled, she watched him disappear through the crowded foyer.

"Well, our boy friend's very devoted!" Macias' sneering voice jarred her thoughts aside.

Steeling herself, Devona watched him drop into the chair Talbot had just vacated.

"Oh, they all are," she said carelessly. "Hadn't you noticed?"

He looked at her sharply. "Don't give me that. This guy's different. He's in love with you. Isn't he?"

"Is he?" she shrugged—a masterpiece of indifference. Then, deliberately risking all on a single party, "I'm tired, Jose. Would you have time to take me home?"

His grim lips relaxed into a confident smile. "Sure. Right now?"

Safe—for the moment! Devona made her way to the dressing room, slipped out of her elaborate costume into the once-smart blue suit gown definitely shiny at the seams now.

Her courage was wearing shiny at the seams, too, she thought as her fingers stumbled with the fastenings on her jacket. This was merely tired on danger for another. But if Macias knew for sure that Tal loved her meant to find a way out—

She caught up the fan and comb and mantilla, fled to Macias' office.

He was waiting for her, the wall safe already ajar. Smiling, he took the valuables, thrust them quietly, almost furtively, into the safe, slammed it shut.

"We'll go out the back way," and he pushed the little white button. The panel slid open as if moved by invisible hands.

Instinctively, Devona shuddered. The back way. There was something sinister about that, too, she felt, but she led the way docilely enough, putting a little yawn as they waited for the panel to slide back.

Still, her fears seemed groundless, really. It was Jose with the big luminous watch in the alley outside. Devona breathed a sigh of relief as she sank back against the luxurious upholstery. And even managed a smile when Jose, deftly manoeuvring the cross-town traffic brought the huge car to a stop before the Brownstone's modest doorway.

"Thanks so much, Jose," she began. But he laid a heavy hand on her knee. "Not so fast, Dona. I want to talk to you a minute."

Leaning forward, he closed the glass panel behind Jose's stiffly non-committal back, looked at her problemingly. "I want to know why you are playing up to young Brasher?"

"But I'm not," Devona denied and looked at him with wide-eyed directness. "Nor to any one else for that matter."

"No?" How comes he hangs around so often?"

"He was at the club last night and to-night. Twice? What's peculiar about that?" she snipped, hiding rising fears behind irritation. "I supposed you liked repeat business."

"Not when it's the assistant D.A.'s brother."

Instantly, Devona's every suspicion came to attention. "Why not?"

"Never mind why not. I just don't want him hanging around you. Get that?" His dark eyes didn't leave her face.

For a long tense moment Macias just sat back behind the thin veil of cigar smoke that enveloped him. Then, too quietly, "I think you do see why."

She felt the net closing in on her. She was stumbling onto something important. She knew that. More than that, Macias had guessed that she knew or suspected something. Her every nerve went taut with fear. With a man like Jose Macias, her little knowledge could be a dangerous thing!

(To Be Continued)

Made Indian Chief

The Earl of Athol, governor-general of Canada, became Chief Kinwinnigwab (Rainbow) of the Ojibways during a colorful ceremony at Fort William on the spot where historians of the Lake Superior area claimed that Hiawatha roamed in the legendary past.

Granite makes up most of the crust of the earth, and in some places it is 20 miles thick.

The wonder of the age is women wondering about other women's ages.

Iran Oil Fields.

Industry Dated From The Very Earliest Days

Loss of Iran to the Axis powers is a serious blow to their internal economy and the obtaining of control by Great Britain and Russia is a very real aid to them. For the latter country, Iran acts as a buffer state, and while to some extent it may be the same for Great Britain, it has a more direct value by reason of its oil production.

Russia, with the second largest oil production in the world, 216,909,000 barrels in 1940, has ample supply for herself. Great Britain is largely responsible for the development of the Iran oil industry through the Anglo-Iranian Oil Company, whose concessions cover most of the southwestern part of the country. The oil is conveyed by pipeline to Abadan, which was taken by the British early in the invasion of the country.

Iran has had an oil industry from the very earliest days. Max Ball, in his book, "This Fascinating Oil Business," relates that Herodotus, about 450 B.C., wrote as to the manner in which oil was obtained from springs and how it was refined by separating its heavier and lighter constituents.

Modern production began in Iran, or Persia as it was then called, in 1913, and in 1938 its production was over 77,000,000 barrels. Its production in 1940, according to the World Petroleum, was only slightly more at 79,150,000, and at that it was in fourth position in world countries producing oil. Iran's oil potentialities are by no means exhausted. In fact it has merely been developed as the market enlarged, and it is said to be capable of very much greater production than hitherto. It is easy, therefore, to visualize the extreme importance of this country to the Nazi powers. Winnipeg Free Press.

Stamp Out Malaria

Rockefeller Foundation To Give Assistance To Peru

The Rockefeller Foundation soon will direct a country-wide campaign in Peru to stamp out malaria, according to a government announcement.

The foundation will provide experienced personnel and funds in the campaign, which is to be carried out by the Peruvian health service.

Malaria is regarded as one of the most serious diseases taking their toll of the Peruvian public, and its ravages are felt on the coast, in the mountains and the forests. Despite all efforts of Peruvian health authorities, no success has been met in combating it.

The government has taken preliminary measures in the battle against malaria, among them ordering compulsory anti-malaria inoculations for the public. This service will be gratis, and employers are to be made responsible for the inoculation of their workers.

Rush Largely Imaginary

But People Do Not Take Time For Grace At Meals

The hop-skip-and-jump tempo of our life-to-day is probably the prime cause of the growing neglect of grace at meals, says the Niagara Falls Review. The taking of food has degenerated into a rush job in which even rudimentary conversation has been displaced by speed. Grace has been dropped as a time-taking episode which is all right if you happen to think of it and have more minutes to spare than usual.

Actually the need for a rush at meals is largely imaginary and grows out of the acceleration in things generally. There are few people who cannot afford the time for grace, and these are days when a little additional thought of the Deity would be good for men's minds.

Good Enough To Repeat

London Paper Found Letter Was Printed Years Ago

History repeats itself, sometimes rather too literally. I printed recently says the London Spectator, a letter, in picturesque English, which had reached me from Hong Kong. It appears that the same letter reached another London paper some 14 years ago, and one of two of my correspondents had inconveniently kept cuttings of it. But it is good enough, all the same, to stand an airing once a decade.

In winter camels are able to go 15 days without water; in summer, only 12 days.

Highest point in British Columbia is Mount Fairweather, 15,287 feet.

Saltiest of the oceans is the Atlantic.

Parents Who Are Lonely

Meet in London Hotel To Exchange Stories And Letters

Parents whose children have been evacuated to the United States met in a London hotel and exchanged anecdotes and letters telling stories of their children's adventures overseas.

It was their common bond. They have not seen their children for 12 months.

I could see that some of those parents are afraid that their children will forget them. Mothers, sad faced but dry eyed, eagerly gathered any crumb of news from across the Atlantic.

The snapshots were pinned up, a haze screen for all to inspect. They showed English boys and girls in their new American homes, wearing cowboy hats and chaps, Indian feathers, swinging lassoes, riding broncos.

The parents are members of a group called "The Kinsmen," to be a permanent bond between parents and children—Overseas Daily Mail.

Earned His Decoration

R. A. Watson Watt Is Man Who Developed Radiolocation

When the name of R. A. Watson Watt appeared in the New Year's Honors in January, only a few people knew why he had been made a Companion of the Bath. They were not really very much enlightened by the information that he was Scientific Adviser on Telecommunications to the Ministry of Aircraft Production. "Radiolocation" had not been heard of. Radiolocation is a system of other waves unaffected by fog, cloud, or darkness, which are constantly sent out far beyond the limits of our shores. Any solid object such as an aircraft or a ship that is in the path of these waves reflects back the signal, which announces to the detecting station its presence in the air or on the water. The navy uses radiolocation to detect aircraft in the same way as it is used by the Royal Air Force.

HOME SERVICE

Tie up to Ogden's!

Old timers, who have tied up to Ogden's for a quarter of a century, know that you're always "tittin' purty" when you're rolling your own with their favourite tobacco. For Ogden's isn't "just another fine cut". It's a distinctive blend of choice, ripe tobacco. So it's smoother, milder, tastier. Try it once and you, too, will tie up to Ogden's from then on...

Only the best cigarette papers — "Vogel" or "Charleston" — are good enough for Ogden's

OGDEN'S FINE CUT

Pipe Smokers! Ask for Ogden's Cut Plug

YOU SOON LEARN PIANO IN THIS SHORT-CUT WAY

Music Adds To Vacation Fun

When you can play the piano, what a magic card of introduction you can take on vacation! Popular tunes win you a welcome anywhere. It doesn't take long to learn to play them. A clever chart, picturing "life-size" the most used part of the piano keyboard, will help you to read music quickly.

Right with each pictured key is its music staff, so the notes can see at once what key to strike for each note.

Then you can speed up your learning of popular pieces this way. Instead of playing all the notes in treble and bass, sometimes difficult to do, play the melody line with your right hand and harmonizing chords with your left.

What chords to play? You quickly learn basic chords, by numbers which correspond to numbered keys on your piano chart. The book from "Swanee River" shows you our sketch gives you the idea. You can play those few chords (and a few more) throughout the piece.

Have the fun of playing the piano! Our 42-page instruction book, including piano keyboard chart, shows you how to read music, play chords in every key. Has three pieces for practice.

Send 15c in coins for your copy of "Quick Course In Piano Playing" to Home Service Dept., Winnipeg News-Paper Union, 175 McDermott Ave. E., Winnipeg, Man.

The following booklets are also available at this special price:

- 197—"Advertising Design Self-Taught"
- 172—"Effective Phrases For All Occasions"
- 199—"Teach Yourself to Sing"
- 130—"World's Best-Loved Poems"
- 108—"Making Plants and Flowers Grow Indoors"
- 155—"Glass Gardens and Novelty Indoor Gardens"

Lowest temperature ever recorded in the United States was 66 degrees below zero, in Yellowstone Park on February 9, 1933.

GEMS OF THOUGHT

PROGRESS

All that is human must retrograde if it does not advance. Gibbon.

I find the great thing in this world is not so much where we stand, as in what direction we are moving—Oliver Wendell Holmes.

Intellectually, as well as politically, the direction of all true progress is toward greater freedom, and along an endless succession of ideas—Bovee.

Literary commercialism is lowering the intellectual standard to accommodate the purse and to meet a frivolous demand for amusement instead of for improvement. Incorrect views lower the standard of truth—Mary Baker Eddy.

Let us labor for that larger comprehension of truth, and that more thorough repudiation of error, which shall make the history of mankind a series of ascending developments—Horace Mann.

All growth that is not toward God, is growing to decay—George MacDonald.

Plan Did Not Work

Nazi Propaganda Effort Failed To Fool Norwegians

The British Broadcasting Corporation told how a Nazi propaganda effort in Norway backfired.

It seems Norwegians were encouraged to see a German movie film, advertised as showing "the great devastation German bombers have caused in London."

At first Norwegian audiences were horrified at the appalling destruction. Then it was recognized, from known landmarks appearing in the pictures, that the movie showed bomb damage in the German city of Hamburg, not London.

Thanks to Kellogg's ALL-BRAN, THAT TROUBLE IS ONLY A MEMORY

"I have suffered considerably from a sluggish digestive system and have tried many remedies which failed to bring relief. But now, thanks to eating KELLOGG'S ALL-BRAN regularly, that trouble is only an unpleasant memory," writes Howard E. Nichol, Penikese, Massachusetts.

KELLOGG'S ALL-BRAN helps you

get at the cause of constipation due to lack of the right kind of "bulk" in the diet. Eat this delicious cereal for breakfast (or try it in muffins) every day and drink plenty of water. But remember, it doesn't work like harsh purgatives... ALL-BRAN takes time. At your grocer's, in two convenient size packages or in individual serving packages at restaurants. Made by Kellogg's in London, Canada.

Around The Town

The council has engaged a caterpillar to make a front street for the residents of Seventh Street East. This work was completed at the weekend and satisfies a long felt want by citizens in that part of town.

A trench has been dug around the fire burning at the sports field. Danger of the fire spreading over the entire field has now been eliminated. Sam Sagoff's caterpillar was engaged to do this work.

Saw a man in one of our refreshment parlours this week waving \$2,000 in cold cash in front of the customers. No! he was not a local citizen.

The drainage pipes being laid alongside the sidewalks at Zak's and the post-office eliminates a danger of broken legs or other serious injury which has existed for many years.

The Catholic hall is the scene of much activity as delegates attending the third annual convention of the First Catholic Slovak Mutual Benefit Society is in session. John Dancu, of Blairmore, is presiding. Delegates are present from B.C. and Alberta.

Notice Jim Park's residence being made ready to be raised.

Judging from the number of armen to be seen walking around the streets at the weekend, Coleman still retains its high reputation for hospitality.

Contractor D'Appolonia's men have been busy this past week laying concrete and installing drain pipes at the rear of the Grand Union hotel. Recent heavy rain storms have been causing damage to this part of the hotel.

Jimmy Brennan, of Trail, called at The Journal office Wednesday morning. "The old town ain't what it used to be," quoted Jimmy "You know, I came up the street yesterday and there were some birds standing at the corner. I heard one say, 'there is a Bremen, but which one? I bet it is Johnny!' They didn't even know me." It is six years since he last visited his home town and there have been many changes. The new high school did not exist and the old bank still stood on the corner where many happy nights were spent. Yes, Jimmy, the old town is not what it used to be. Time marches on!

Confession

Judge, to Negro: "Have you a lawyer?"
Defendant: "Naw, suh. We has decided to tell de truth."—Atlanta Two Bolls.

Other relatives visited Mrs. Kimkel's sister, Mrs. C. Hardy, and brother, Mr. Adam Hammer. The party also visited Mr. Kimkel's sister and brother, Mrs. Fred Burns and Mr. Andrew Kimkel, of Pincher Creek.

Mr. and Mrs. Steve Panek, accompanied by Mr. and Mrs. Christie and sons, Carol and John, of Bellevue, motored to Banff and Canmore at the weekend where they visited old friends.

St. Alban's Church

Rev. J. R. Hague, A.Th., Incumbent Sunday, September 14th—Even-song 7 p.m.

In compliance with the proclamation of the Government of the Dominion of Canada, this will take the form of a Reconciliation Service, and it is hoped that all our people will be on hand to reconsecrate themselves to the cause for which Canada is fighting and to honor all those "who on land, sea, and in the air, are defenders of our country."

THANKSGIVING DAY
A proclamation in the Canada Gazette of August 16, 1941, appoints Monday, 13th October, 1941, as Thanksgiving Day.

The duty of labor is written on a man's body; in the stout muscle of the arm, and the delicate machinery of the hand.

—Theodore Parker.
Labor is discovered to be the great, the grand conqueror, enriching and building up nations more surely than the proudest battles.—Channing.

John Williams Passed Away on Wednesday

Had Been McGillivray Creek Blacksmith; Funeral Saturday; Interment at Calgary

John Williams, aged 69, a well known and esteemed citizen, passed away at the local hospital on Wednesday evening at 6 o'clock. He had been admitted to hospital on August 2. He was born at Aberystwgh, Wales.

Deceased and Mrs. Williams came from Calgary to Coleman eighteen years ago. He had been employed as McGillivray Creek blacksmith for many years. By his friendly nature he had made many friends among his fellow workers.

Funeral services will be held at the United church at 10 a.m. Rev. J. E. Kirk and Capt. F. Watson officiating. The body will then be taken to Calgary for interment in Burnsland cemetery.

Surviving are the widow and a daughter, Mrs. T. Morgan, of Calgary.
